OFFSHORE **HVAC** SOLUTIONS

# OFFSHORE HVAC OFFERINGS

## Overall support from design to training

Specialized in HVAC services, industrial cold, air handling and climatic engineering, Paumier ensures a full expertise to support your entire project

### Study, design, installation

- Tailor-made design following the clients needs : weight, dimensions, capacity, flow, sound levels, climate data
- Integration to customers' specifications in collaboration with the engineering and design department
- Installation of equipments on site

### Commissioning

- Air conditioning and air handling of living quarters and technical premises
- Galleys equipment, refrigerated food storage
- Manufacturing in workshop and commissioning on the production and/or final site

### After-sales Maintenance

- Creating spare parts nomenclature
- Supplying and sending relevant parts to all of your sites
- Our experienced and skilled teams are at your disposal for preventive and/or corrective actions

### Spare parts

- Dedicated spare parts Service : offering optimized solutions in terms of lead time and cost
- Service responsiveness : internal stock for standard articles and short supply chain for specific parts
- Technical advice and alternative proposal in case of equipment obsolescence

### Technical expertise

- Ability to produce technical design ideas during the preliminary draft
- Completion of technical audits on site
- Action/upgrade plan on site
- Occasional missions combining expertise and repair
- Paumier technical support ensuring a 24-hour hotline

### Training center

- «Maintenance Response Methodology of Refrigerating Facilities» : combining theory and HVAC practice
- «Designing and sizing a refrigerating installation» : by taking into account regulation constraints
- Tailor-made training according to your needs (in English, adapted to your installations, on site...)

# OUR HVAC EXPERTISE

## Intervention on all production sites

### OUR AREAS OF EXPERTISE

#### Onshore and Offshore

- Drilling barges
- Drilling ships
- Fixed platforms
- Floating platforms
- Tenders (logistic support)
- Service boats

### OUR EXPERTISE

#### Air handling and air conditioning

- All types of high efficiency filtration
- Purification, pressurization
- Air conditioning / heating
- Dehumidification
- Ventilation of galleys, machinery and technical rooms
- ATEX explosive atmospheres

#### Refrigerating systems

- Coolant or direct expansion
- Equipments for all types of fluids : ammonia, CO2
- Reciprocating, screw, hermetic compressors
- All capacities equipments
- Air, water condensation
